SUBJECT INDEX

$\alpha\mu$ stripping by ionization
$\alpha\mu$ stripping by ionization in dense deuterium/tritium mixture, and its implication for muon-catalyzed fusion, 189

β-spiral
The molecular dynamics of the β-spiral of the polypentapeptide of elastin in "state III" with 2.9 pentamers per turn, 303

Angular momentum
Molecules with high rotational angular momentum: a generalized ab initio approach, 265

Antiferromagnetism
Antiferromagnetism in copper oxide planes, 313

Atomic negative ions
Bound excited states of atomic negative ions, 283

Band structure
The effect of an oscillatory time-dependent magnetic field on the band structure of polymers, 55

Basis set superposition error
Dissection of basis set superposition error at SCF and correlated levels: HF dimer, 9

Clifford algebra
Clifford algebra realization of Rumer–Weyl basis, 85

Copper oxide
Antiferromagnetism in copper oxide planes, 313

Cs
Numerical multiconfiguration Hartree–Fock calculations for $nsnp^3P$ states of Rb and Cs negative ions, 61

Cu porphyrin π-cation radicals
Spin coupling in Cu porphyrin π-cation radicals, 137

Determinantal state
Time-dependent dynamics of a determinantal state, 23

Diazepinediones
An NMR and computational study of diazepinediones, 175

Dynamics
The molecular dynamics of the β-spiral of the polypentapeptide of elastin in "state III" with 2.9 pentamers per turn, 303

Elastin
The molecular dynamics of the β-spiral of the polypentapeptide of elastin in "state III" with 2.9 pentamers per turn, 303

Electron density transfer
Metals in biology: possibilities of electron density transfer in iron complexes with hard and soft ligands, 149

Electronic states
The equilibrium conformation of molecules with strongly coupled electronic states, 225

Entropy
Calculation of the entropy of a fluid by a Monte-Carlo simulation based on free volume, 33

Equilibrium conformation
The equilibrium conformation of molecules with strongly coupled electronic states, 225

Excited states
Bound excited states of atomic negative ions, 283

Group theoretical aspects of the periodic table
Group theoretical aspects of the periodic table of the elements, 103

Hamilton formalism

The Hamilton formalism of Gaussian wave-packet dynamics, 245
Hamiltonians
Construction of triatomic potentials from algebraic Hamiltonians which represent stretching vibrational overtones, 201
Hartree-Fock calculations
Numerical multiconfiguration Hartree-Fock calculations for $nsnp^3P$ states of Rb and Cs negative ions, 61
HF dimer
Dissection of basis set superposition error at SCF and correlated levels: HF dimer, 9

Iron complexes
Metals in biology: possibilities of electron density transfer in iron complexes with hard and soft ligands, 149

Löwdin α-function
The Löwdin α-function and its application to the multi-center molecular integral problem over Slater-type orbitals, 233

m-basis
Spin free orthogonal m basis, 1
Magnetic field
The effect of an oscillatory time-dependent magnetic field on the band structure of polymers, 55
Molecular structure
From non-random, molecular structure, to life and mind, 183
Molecular systems
Nuclear-charge scaling in molecular systems, 271
Molecule–surface interaction
A computationally feasible strategy for partitioning theory of the molecule–surface interaction, 215
Monte-Carlo simulation
Calculation of the entropy of a fluid by a Monte-Carlo simulation based on free volume, 33
Multi-center molecular integral problem
The Löwdin α-function and its application to the multi-center molecular integral problem over Slater-type orbitals, 233
Muon-catalyzed fusion
$\alpha\mu$ stripping by ionization in dense deuterium/tritium mixture, and its implication for muon-catalyzed fusion, 189

N-representability problem
Coherent state approach to the N-representability problem, 119
$nsnp^3P$ states
Numerical multiconfiguration Hartree-Fock calculations for $nsnp^3P$ states of Rb and Cs negative ions, 61
Nuclear-charge scaling
Nuclear-charge scaling in molecular systems, 271

Overtones
Construction of triatomic potentials from algebraic Hamiltonians which represent stretching vibrational overtones, 201

Partitioning theory
A computationally feasible strategy for partitioning theory of the molecule–surface interaction, 215
Polymers
The effect of an oscillatory time-dependent magnetic field on the band structure of polymers, 55

Rb
Numerical multiconfiguration Hartree-Fock calculations for $nsnp^3P$ states of Rb and Cs negative ions, 61
Reduced density matrices
Reduced density matrices N-representable by correlated determinant wave functions, 337
Relativistic density functional theory
Relativistic density functional theory, 75
Resonance
Resonance and transmission, 327
Rumer–Weyl basis
Clifford algebra realization of Rumer–Weyl basis, 85

Sanibel coefficients
Sanibel coefficients revisited, 257
Slater-type orbitals
The Löwdin α-function and its application to the multi-center molecular integral problem over Slater-type orbitals, 233
Spin coupling

Spin coupling in Cu porphyrin π-cation radicals, 137

Time-dependent dynamics
Time-dependent dynamics of a determinantal state, 23

Transmission
Resonance and transmission, 327

Triatomic potentials
Construction of triatomic potentials from algebraic Hamiltonians which represent stretching vibrational overtones, 210
